cloud services.

COMTRADE
SYSTEM INTEGRATION

Comtrade Group

Comtrade Group

In the domain of IT, Comtrade is one of the largest groups of companies in Central and Southeast Europe. Comtrade Group acts as an incubator for new and exciting technologies delivered through its four member companies.

Comtrade System Integration

Comtrade System Integration uses the latest solutions, deep domain knowledge and partnerships with global vendors to help businesses accelerate and simplify deployment of new technologies.

Comtrade Distribution

Comtrade Distribution is a leading regional distributor of IT equipment, smart devices and consumer electronics offering more than 5000 products including home electronics and IT product ranges under its own brand, Tesla.

Comtrade 360

Comtrade 360 provides top-notch software development services for businesses, focusing on data protection, application infrastructure, cloud and hybrid cloud solutions, cyber security, AI and ML.

Comtrade Gaming

Comtrade Gaming is a provider of open gaming platforms, technology solutions and professional services for both online and land-based operators.

System Integration for digital success

We help you harness the power of digital transformation by connecting the dots between now and tomorrow.

Comtrade System Integration is Southeast Europe’s leading system integrator and member of Comtrade Group, a recognized leader in software engineering and technology deployment services. Comtrade System Integration acts as a bridge between global powerhouses such as Microsoft, IBM, Dell, Huawei and others on one end, and financial institutions, telcos, government institutions and companies from various industries on the other.

Infrastructure as a Service (IaaS)

Embark on a journey towards unparalleled IT agility with our IaaS solutions. Our service provides much more than traditional physical infrastructure, offering you a realm of boundless scalability and flexibility. We specialize in renting redundant computer resources, storage, and network infrastructure tailored to various industry needs. This includes managed hosting for a range of applications and systems, from Microsoft environments to specialized industry software like Tenova and online gaming platforms.

Our comprehensive service encompasses setting up environments for critical applications, ensuring seamless operation with complete monitoring and reporting at the application level. Experience empowerment as your enterprise soars with our robust IaaS solutions.

IaaS portfolio:

Managed hosting solutions	Redundant computing resources	Storage & network infrastructure	Application-level monitoring & reporting
Microsoft system setups (Active Directory, Exchange, etc.)	SAP environment configuration	SQL database management	Virtual machine setup for various applications
Online gaming platform support	Web portal hosting		

Disaster Recovery as a Service (DRaaS)

Prepare for the unexpected with DRaaS, the cornerstone of business resilience. Focusing on safeguarding your crucial data and applications against disruptions, our disaster recovery solutions employ advanced techniques like Veeam replication at the hypervisor level. We create copies of virtual machines for a complete production environment, ensuring continuous protection for a variety of applications, ranging from industry-specific software to general Microsoft systems and beyond. Our DRaaS guarantees peace of mind, keeping your operations uninterrupted in the face of adversity.

DRaaS portfolio:

Veeam replication for VMs	Hypervisor-level data protection	Production environment backups	Microsoft system recovery (Exchange, Active Directory)
Resilient video surveillance systems	Comprehensive data center disaster recovery	Business continuity assurance	

Backup as a Service (BaaS)

Secure your digital assets with our BaaS, offering unparalleled protection and peace of mind. We specialize in creating additional data copies for archiving and recovery, ensuring your data's integrity against loss or corruption. We cover a broad spectrum of applications, from Microsoft and SAP systems to specific industry software, ensuring all your critical data is backed up and recoverable. Our BaaS provides a safety net for your digital environment, making data loss worries a thing of the past.

BaaS portfolio:

Data archiving and recovery	Additional data copy creation	Protection against data loss/corruption	Microsoft & SAP data backup
SQL and application data safeguarding	Multi-environment data protection	Business-critical data security

Platform as a Service (PaaS)

Unleash your development potential with our PaaS, a haven for innovation without traditional constraints. This platform excels in providing a robust foundation for building and deploying applications, including complete, web-managed hosting with redundant computer resources, storage, and network infrastructure, coupled with comprehensive monitoring and reporting. From developing sophisticated web platforms to supporting various development needs, our PaaS is the bedrock for turning your vision into reality.

PaaS portfolio:

Complete web managed hosting	Redundant computing & storage resources	Infrastructure for web platforms	Extensive monitoring and reporting
Application development support	Flexible and scalable platform solutions

Software as a Service (SaaS)

Experience a paradigm shift with our SaaS offerings and step into a new world where using software is not only efficient but also remarkably convenient. Our cloud-based solutions bring the latest software directly to you via the Internet, eradicating the need for complex installations and maintenance. With SaaS, you gain access to a suite of applications that are always up-to-date, highly scalable, and accessible from anywhere.

This service is ideal for businesses seeking to streamline operations, enhance collaboration, and reduce IT overheads. From CRM systems and project management tools to advanced analytics and communication platforms, our SaaS solutions cater to a wide array of business functions, ensuring you have the right tools at your fingertips to thrive in a digital-first world.

SaaS portfolio:

Cloud-Based Software Suite	Always Up-to-Date Applications	Highly Scalable Solutions	Anywhere Accessibility
Operational Streamlining	Tailored for Diverse Functions	Reduced IT Overheads	Digital-First Thriving

Cloud solutions enable a

Desktop as a Service (DaaS)

Revolutionize your workspace with our DaaS solutions, where flexibility and accessibility redefine the work experience. This fully managed, virtualized desktop service allows you to access your personalized work environment from any location, on any device. This offering is particularly beneficial for organizations with remote or mobile workforces. Not only does it ensure consistent access to necessary resources but also maintains high levels of security and compliance. DaaS eliminates the need for expensive hardware investments and reduces the IT workload associated with managing desktop environments. With our service, experience enhanced mobility, improved security, and a significant boost in productivity, as we bring the office to you, wherever you are.

DaaS portfolio:

Virtualized Workspace	Fully Managed Virtual Desktops	Remote and Mobile Workforces	Security and Compliance Assurance
Cost-Effective Solutions	IT Workload Reduction	Enhanced Mobility	Improved Security Measures

Cloud providers' advanced security measures result in a
